

MUHAMMAD ATIF

CRM & BUSINESS SOFTWARE DEVELOPER | PHP / MYSQL | BUSINESS AUTOMATION

Faisalabad, Pakistan | 03467560172 | matifzahoor157@gmail.com | atifs.onlinewebshop.net | [LinkedIn](#) | [GitHub](#) | [GitLab](#) | [X](#)

PROFESSIONAL SUMMARY

CRM and business-software developer with hands-on experience designing and improving custom PHP/MySQL systems across CRM, billing, collections, client operations, permissions, reporting, payment workflows, and internal communication. Combines software implementation with real-world accounts-receivable and customer-facing experience, enabling strong translation of business requirements into practical application features. Experienced in AI-assisted rapid prototyping, live debugging, integration work, and iterative delivery; building toward modern backend, API, automation, and scalable SaaS engineering practices.

TECHNICAL SKILLS & JOB-MARKET KEYWORDS

- PHP / Backend: PHP, server-side development, business logic, OOP concepts, validation, sessions, authentication, authorization, modular application design.
- Databases: MySQL, MariaDB, SQL, relational data modeling, CRUD, joins/filtering concepts, search, reporting queries, data integrity.
- CRM Engineering: CRM development, customer/lead/contact management, roles & permissions, custom fields, tasks, activities, notifications, global search, configurable workflows, admin panels.
- APIs & Integrations: API integration, REST concepts, webhooks, Stripe, ACH/payment workflows, SMTP/email, third-party service integration.
- Web Development: HTML5, CSS3, JavaScript, AJAX, responsive interfaces, WordPress, browser debugging.
- Automation & Operations: workflow automation, scheduled jobs, automated reminders, billing/collections workflows, calendar synchronization, process improvement, Revenue Operations (RevOps) fundamentals.
- Security & Quality: PDO/prepared statements, password hashing, CSRF protection, server-side permission checks, output escaping, file-upload validation, credential protection, activity/audit logging.
- Tools & Delivery: XAMPP, Git/GitHub working knowledge, technical documentation, live issue debugging, AI-assisted development and rapid prototyping.
- Business & Collaboration: requirements analysis, customer communication, cross-functional collaboration, stakeholder support, sales communication, objection handling, process documentation.

PROFESSIONAL EXPERIENCE

Syed Professional Services Company (USA-based Tax Filing Company) | Faisalabad / Remote

Accounts Receivable Executive | CRM Functionalist & Lead Developer | Feb 2025 - Present

- Manage and verify invoices, billing records, payment follow-ups, and collection activity while improving workflows supported by the company CRM.
- Designed the architecture and functional logic of CRM enhancements across billing, client records, search, permissions, reporting, communication, and workflow modules.
- Expanded legacy invoicing workflows into a broader CRM platform with structured records, role-based access, activity tracking, and configurable business processes.
- Integrated and supported Stripe/ACH payment workflows, automated invoice reminders, payment-status handling, and related billing operations.
- Designed relational MySQL application logic for secure record handling, filtering, search, and operational reporting.
- Built/refined internal messenger logic for departmental routing, client information sharing, and communication history.
- Used AI-assisted rapid prototyping for PHP/HTML starting points and directed debugging, integration, refactoring, and production-oriented validation.
- Translated finance and client-service requirements into implementable CRM features and collaborated on live issue resolution.

Call Center - UAE Campaign

Sales Representative | Jun 2024 - Jan 2025 | Faisalabad

- Handled outbound sales to UAE customers, practiced needs discovery, objection handling, persuasion, follow-up, and customer communication in a target-driven environment.

Call Center - UK Campaign

Outbound Sales Representative | Earlier Experience | Faisalabad / Remote

- Engaged UK customers through outbound calling, handled objections, communicated product value, and developed customer-facing communication and negotiation skills.

SELECTED CRM ENGINEERING PROJECT

GRAVITY CRM - Custom PHP / MySQL Professional Services CRM | Architecture & Development

- Designed a modular CRM foundation covering authentication, users, roles, permissions, clients, leads, contacts, businesses, activities, notifications, tasks, settings, and global search.
- Implemented configurable fields, modules, icons, and layouts to support different staff roles and business requirements.
- Developed and integrated business workflows around billing, collections, communications, reporting, reminders, and third-party services.
- Built a phased foundation intended to expand into deeper CRM modules, workflow automation, AI capabilities, integrations, and hardened deployment practices.
